CompTIA Cloud+ (CV0-003) Video Training Series

Module 1: Course Introduction

- CompTIA Cloud+ CV0-003 Introduction
- Meet Your Instructor
- About Your Exam
- Your Exam Study Tracker

Module 2: Cloud Architecture and Design

- Module 2 Introduction – Cloud Storage Types
- What is Cloud?
- Deployment Models
- Service Models
- Advanced Cloud Services
- The Shared Responsibility Model

Module 3: Advanced Design Topics

- Module 3 Introduction – Advanced Design Topics
- Factors that Contribute to Capacity Planning
- HA and Scaling in Cloud Environments
- Cloud Environments
- Cloud Testing Techniques

Module 4: Identification and Authorization

- Module 4 Introduction – Identification and Authorization
- Directory Services
- Single Sign-On
- Public Key Infrastructure

- Other Identity Topics

Module 5: Networking

- Module 5 Introduction – Networking
- Network Segmentation
- Other Networking Topics
- Building a Virtual Network in AWS
- Testing a Virtual Network in AWS
- Deleting Virtual Resources

Module 6: Security Controls

- Module 6 Introduction - Security Controls
- OS and App Security Policies
- Encryption
- Other Security Controls

Module 7: Other Cloud Services and Tech

- Module 7 Introduction - Other Cloud Services and Tech
- Subscription Services
- Provisioning Resources and Applications
- Interaction of Cloud Components
- Interaction of Non-cloud Components

Module 8: Cloud Compute

- Module 8 Introduction - Cloud Compute
- Deploying VMs and Using Templates
- Other Compute Topics

Module 9: Cloud Storage

- Module 9 introduction - Cloud Storage
- Cloud Storage Types
- Cloud Storage Tiers and IOPS
- Storage Tiers in AWS
- Other Cloud Storage Topics

Module 10: Cloud Networking Services

- Module 10 Introduction – Cloud Networking Services
- VPNs and Virtual Routing
- Network Appliances and Private Virtual Cloud
- Dragging Network Appliances and Private Virtual Cloud

Module 11: Virtualization

- Module 11 Introduction – Virtualization
- vCPUs vGPUs and Memory
- Other Virtualization Topics

Module 12: Cloud Migrations

- Module 12 Introduction – Cloud Migrations
- Cloud Migrations
- Other Migration Types
- Workload Migration Considerations

Module 13: Logging

- Module 13 Introduction – Logging
- Logging
- Network Management and Monitoring Today
- Dragging Network Management and Monitoring Today

Module 14: Maintaining Efficient Operations

- Module 14 Introduction – Maintaining Efficient Operations
- Right-Sizing and Placement
- Device Drivers

Module 15: Automation and Orchestration

- Module 15 Introduction – Automation and Orchestration
- Backups
- Perform DR Tasks

Module 16: Troubleshooting Basics

- Module 16 Introduction – Troubleshooting Basics
- A Troubleshooting Methodology and Troubleshooting Tools
- Basic Cloud Troubleshooting
- Troubleshooting VM Connections

Module 17: Advanced Cloud Troubleshooting

- Module 17 Introduction – Advanced Cloud Troubleshooting
- Advanced Cloud Troubleshooting
- Troubleshooting Automation and Orchestration
